

IceMOS

Cooler than Cool

IceMOS Technology is a global supplier of high quality Advanced Engineering Silicon substrates to the Semiconductor industry. We have over 20 years experience in the design, development and manufacturing of our products, providing very high quality substrates for applications in Integrated Circuits, Opto-Electronics, Discrete Semiconductor Devices, the Swiss Luxury Watch industry and MEMS Sensors for Automotive, Wearable Technology, Medical and Industrial applications.

IceMOS is dedicated to producing high performance semiconductors; we design for Quality and Manufacturability – ensuring that we meet our customer's expectation, every time.

IceMOS Technology is a private USA company based in Tempe Arizona, with operations in Northern Ireland, Japan, Singapore and China.

Job Title:	Production Operator
Reporting to:	Operations President
Basic Job function:	To perform the duties of factory operator in accordance with the contract and employee handbook. The role does involve shift work on a 12 hour basis, with 4 days on 4 days off. Will rotate day and night each month. You will be required to work in a semiconductor cleanroom environment and follow all procedures relating to this.
Requirements:	5 GCSE including mathematics and English or equivalent.
Overall Responsibility for:	The operation of production processes in relation to the site quality requirements of ISO and TS.

Job responsibilities & duties:

1. Ensuring all production operations on site meet or exceed customer requirements in terms of product build quality, delivery expectations, distribution lead times and quality.
2. All operators will learn the company goals and quality policy.
3. All operators will need to understand the cleanroom environment they work in and will be responsible for the cleanliness of their own environment and the site.
4. All operators will be expected to learn how the company quality system works and how this impacts their role.
5. Actively work as part of the MRB team to reduce scrap.
6. All operators will be expected to monitor their own training plan and keep up to date on any changes to their PDP.
7. Ensuring that all practices adopted on site comply with the Health and Safety at Work Act.
8. Ensuring that all practices adopted on site comply with the Icmos code of business conduct and ethics policy
9. All operators are expected to know the production line and to actively seek work.
10. To work day and night shift and maintain an excellent timekeeping and attendance record.
11. To work to the best of ones ability to ensure the success of the company.
12. All other reasonable tasks required for the successful operation of Icmos Technology Ltd.
